

## 2016 Woodbury Lakes Residential Streetside Raingardens

### Background:

The South Washington Watershed District SWWD has identified streetside raingarden locations in Subwatershed Retrofit Analyses for Wilmes, Powers, and Colby lakes. In 2016, the city of Woodbury will be rehabilitating many neighborhood streets where raingarden retrofit locations have been identified. The 7 raingarden locations above represent the best of the identified locations for water quality improvement to lake resources, where landowner agreements were secured, and where the City is able to include some of the retrofit work in their street rehabilitation project scope of work.

### Project Locations: 7 total

ADDRESS	LAKE RESOURCE
8867 Rainier Dr	Colby
2297 Leyland Cir	Colby
1219 Sunset Dr	Wilmes
10070 Bridgewater Pkwy	Powers
